PROFESSIONAL SUMMARY

Software Engineering graduate specializing in Java backend development and AI-based applications. Experienced in building scalable REST APIs using Spring Boot, integrating MySQL databases, and developing intelligent systems using NLP models. Strong in Data Structures, System Design, and performance optimization. Proven ability to develop real-world projects including AI-powered applications and full-stack systems. Patent holder in NLP-based query systems.

SKILLS SUMMARY

- **Programming:** Java, SQL, JavaScript
- **Backend:** Spring Boot, REST APIs, JDBC, Servlets
- **Database:** MySQL (Joins, Indexing, Query Optimization)
- **Frontend:** HTML5, CSS3
- **AI & Tools:** Hugging Face API, LLaMA 3, NLP Basics
- **Tools:** Git, GitHub, Postman, VS Code, Eclipse
- **Concepts:** OOP, DBMS, Operating Systems, Computer Networks, SDLC

EDUCATION

- **KPR Institute of Engineering and Technology** Coimbatore, India
B.E. Computer Science and Engineering (CGPA: 7.00) 2021 – 2025

TRAINING

- **QSpiders Software Training Institute** Bangalore, India
Full Stack Java Development 2025
 - **Technologies:** Core Java, Advanced Java, JDBC, Servlets, Spring Boot, SQL, HTML, CSS, JavaScript
 - **Development:** Built backend systems, designed REST APIs, integrated MySQL databases

EXPERIENCE

- **AXCEL IT SOLUTION** Coimbatore, India
Web Developer Intern Jan 2023
 - Developed backend functionalities using Core Java and JDBC, implementing business logic and integrating MySQL databases.
 - Designed and executed optimized SQL queries for CRUD operations, improving data retrieval performance.
 - Debugged and resolved application issues, enhancing system reliability and reducing errors.

PROJECTS

- **AI Resume Analyzer — Full Stack AI Application:** Developed an AI-powered resume analysis system using LLM APIs (Hugging Face / LLaMA 3) to evaluate resumes and provide improvement suggestions. Implemented text parsing, keyword extraction, and ATS score analysis. Designed backend using Spring Boot and deployed using Render for live access.
GitHub: github.com/suryanarayanan20/resume-analyzer
Live Demo: resume-analyzer-2edj.onrender.com
Key Features: Resume scoring, skill gap analysis, AI feedback, file upload system
- **Coffee Shop POS System — Full Stack Web Application:** Developed a database-driven POS system to manage billing and orders. Implemented backend using Java and JDBC with OOP principles. Integrated MySQL with optimized schema and queries to ensure efficiency and scalability.
Live Demo: [Project Link](#)
- **SWAG-Based Query Response System — AI Project:** Developed a transformer-based NLP system for Tamil query evaluation with bi-directional attention mechanisms. Improved semantic understanding and multilingual support. Patent published by Indian Patent Office (2024).
GitHub: [Project Link](#)

PUBLICATION / PATENT

- **SWAG-Based Query Response System:** Application No: 202441074679
Filed: Oct 03, 2024 — Published: Oct 11, 2024
Proposed NLP architecture using layered bi-directional transformers for intelligent query response systems.
